## Abwägung im Recht

### Chancen und Grenzen numerischer Verfahren im Öffentlichen Recht

EKKEHARD HOFMANN

Abwägung im Recht

jus Publicum  
158

Mohr Siebeck

The normative theory of government discretion in relation to both lawmaking and administrative adjudication, which is one of the central elements of planning law, has yielded a wealth of valuable insights based on an analysis of a long and extensive case law history. However, up to now little attention has been paid to the fact that the doctrine of reasonable commensuration (*Abwägungsgebot*), which is derived from the principle of proportionality, makes certain methodological demands, particularly pertaining to predictions and value judgments, demands that cannot be sufficiently dealt with by using only natural language. In view of the gulf between these requirements and their implementation, Ekkehard Hofmann studies the potential usefulness of the numerical methods, developed in economic decision theory for carrying out the overall assessment that is necessary for making balanced decisions and communicating their rationale.

**Ekkehard Hofmann** Geboren 1966; Studium der Rechtswissenschaften in Hamburg; 1997 Promotion; 2002-2003 Visiting Scholar an der New York University School of Law; 2006 Habilitation; Privatdozent an der Universität Hamburg; derzeit stellv. Leiter des Departments Umwelt- und Planungsrecht am Helmholtz-Zentrum für Umweltforschung - UFZ, Leipzig.
